Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 11 January 2005.
 2a) This action is **FINAL**. 2b) This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4,8-15,19-24,28-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Grundmann et al. in view of Corr (6,785,627).

With respect to Claims 1,12,21,32, Grundmann teaches the receiving step/design information receiver in his claim 7 and the determining step/design test verification test selection unit and evaluating step/evaluation unit on the front page diagram and column 4, lines 21-46. Grundmann teaches all the claim limitations except for identifying a noise event. Corr teaches identifying a noise event in the Title and column 1, lines 15-17. It would have been obvious to one of ordinary skill in the art to identify a noise event because “noise [has] an increased effect on internal path delays” as taught by Corr in column 1, lines 55-59. With respect to Claims 2,13,22, Grundmann teaches the manual or algorithmic test definition processes in column 3, lines 21-52. With respect to Claims 3,23, Grundmann teaches the executing and recognizing steps in column 2, lines 56-67. With respect to Claims 4,15,24, Grundmann teaches the simulator monitor function/receiver (conditional inversion) 166 on the front page diagram and the executing step/module and monitoring step on the front page diagram and his claims 12 and 16. With respect to Claims 8,19,28, Grundmann teaches the description

file/generator(computer code) in column 1, lines 34-36 and the causing step/test executive module 162 on the front page diagram. With respect to Claims 9,29, Grundmann teaches the receiving and verifying steps in column 2, lines 18-21. With respect to Claims 10-11,30-31, Grundmann teaches simulating a timing event in column 1, lines 50-61 and automatically generating a test pattern for the timing event in his claim 1. With respect to Claim 14, Grundmann teaches the executive module 162 and the analyzer 164 on the front page diagram. With respect to Claim 20, Grundmann teaches the directing, starting, receiving, and issuing steps in his claim 7.

Allowable Subject Matter

3. Claims 5,7,16,18,25 and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: The Examiner reserves comment until the entire instant invention is in condition for allowance.

Response to Arguments

5. Applicant's arguments with respect to claims 1,12,21 and 32 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

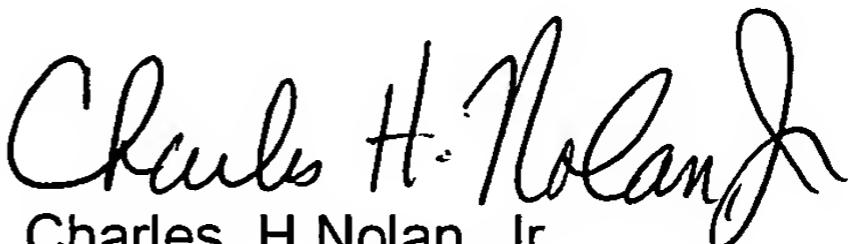

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
